Reviewer’s report

Title: The glycemic, insulinemic and plasma amino acid responses to equi-carbohydrate milk meals, a pilot-study of bovine and human milk.

Version: 2 Date: 14 September 2012

Reviewer: Paolo Tessari

Reviewer’s report:

I have no further comments on this MS. The yet uncomplete answer to my question (about a more complete statistical analysis) was either because the question was not entirely clear or it was not understood. I simply meant to perform multiple regression analysis including the various measured variables. Such an analysis however might not be required to support the main, relatively simple message of this study.

The paper can be accepted as revised.

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
