Reviewer's report

Title: Nutritional Supplement Products: Does the label information influence purchasing decisions for the physically active.

Version: 2 Date: 5 September 2013

Reviewer: Shelly Meltzer

Reviewer's report:

The authors have addressed the minor essential revisions suggested in my initial review. For an easier read and better flow, language and grammar still needs some attention, particularly in the discussion.

Discretionary revisions:
In the results section and table headings "information on label" and "information not on container label " (i.e. pharmacist, dietitian...) could be replaced with "factors on the label influencing purchase", and "other factors"...

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
