Reviewer's report

Title: New perspectives on vitamin D food fortification based on a modeling of 25(OH)D concentrations

Version: 3 Date: 10 October 2013

Reviewer: Margaretha Haugen

Reviewer's report:

1. Minor Essential Revision correction regarding the reference to Rasmussen et al. still is wrongly cited. " But Rasmussen does not take into account the possibility that those using supplements may also have a high nutrient intake from natural vitamin D sources." The authors use the 95 percentile of intake in their model so I think they do take into account the ones with high intake!

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
