Reviewer's report

Title: Indigestible carbohydrates in barley as modulator of glucose metabolism, perceived satiety and voluntary food intake over 16 h in healthy adults - implicating colonic fermentation and stimulation of glucagon-like peptide-1

Version: 1 Date: 29 November 2012

Reviewer: Cyril Kendall

Reviewer's report:

This is an interesting study conducted by a well respected research group in the field. The current findings build on previous work conducted in this area. The manuscript is well written, the methods adequately described and the data is clearly presented and interpreted.

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

No conflict of interest to declare.
