Reviewer's report

Title: Assessing dietary intake among infants and toddlers 0-24 months of age in Baltimore, Maryland, USA

Version: 2 Date: 28 March 2013

Reviewer: Dan Ramdath

Reviewer's report:

Minor Essential Revisions

page 3; line 33: .. not sure how dietary intakes can be used to monitor nutritional status. Perhaps dietary assessment can be used to monitor dietary or nutrient intakes, not nutritional status.

page 4; line 52: the authors acknowledge that this sample is representative of African-American infants and toddlers from lower SES group living in Baltimore. As such line 52 should be modified.

Page 7: lines 114-115: how does the exclusion of portion sizes affect the utility of the proposed FFQ?

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
