Reviewer's report

Title: Intakes of calcium, vitamin D, and dairy servings and dental plaque in older Danish adults

Version: 4 Date: 24 March 2013

Reviewer: Jennifer Lin

Reviewer's report:

The authors have adequately addressed the comments by the reviewers. A few minor issues need to be discussed:

1. Could the authors provide dietary information on calcium and vitamin D intakes?
2. Does information on dairy products capture most intake information? If only a subset was offered in the text, the authors should mention this limitation in the discussion section.
3. Please also comment on whether the current findings may be applied to the general population, or just the more healthy/wealthy population?

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.
