Reviewer’s report

Title: Dietary habits of pregnant women and implications for child health: a survey of predominantly Hispanic women in California.

Version: 1 Date: 4 March 2013

Reviewer: Andrzej Wojtyla

Reviewer’s report:

Article interesting, but could be based on a larger population. It is a pity that the population surveyed was not randomized in some way. The discussion had to rely on the Developmental Origin of Health and Diseases (DOHaD).

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.
