Reviewer's report

Title: Does Pomegranate intake attenuate cardiovascular risk factors in hemodialysis patients? Results of a randomized placebo controlled trial

Version: 2 Date: 2 December 2013

Reviewer: Juscelino Tovar

Reviewer's report:

Minor essential revisions:

The initial comments and questions have been addressed in the revised manuscript.

There are still two points that need correction:

- In the introduced description of placebo juice: "The placebo contained: pomegranate artificial extract of Frutarom Ltd; Corrosive acid; Caramel as color material..." What do the authors mean by "corrosive acid". There must be a typo!
- Reference 12: It should read "chemistry" instead of "chimtry"

Quality of written English: Needs some language corrections before being published

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
