Reviewer's report

Title: Low-dose menaquinone-4 improves gamma-carboxylation of osteocalcin in young males: a non-placebo-controlled dose-response study

Version: 2 Date: 13 July 2014

Reviewer: Kiyoshi T. K. Tanaka

Reviewer's report:

I think that the authors have adequately responded to the suggestions by the reviewer. This time, I have made some minor comments.

Major Compulsory Revisions: None.

Minor Essential Revisions

Page 9, Line 132: 65 microgram, not 60 microgram.

Page 9, Line 131: The expression "less than the DRIs" should be changed to such as "less than the adequate intake (AI) in the DRIs". DRIs denotes the whole system, not a single parameter.

Discretionary Revisions: None.

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I declare that I have no competing interests.
