Reviewer's report

Title: Improved Weight Management Using Genetic Information to Personalize a Calorie Controlled Diet

Version: 2 Date: 18 September 2007

Reviewer: Maria C. Ochoa

Reviewer's report:

General

The manuscript has been considerably improved. Almost all the main objections has been corrected and included in the discussion section properly. However, the use of a one-way analysis test has been not justified, and I advice the authors to do it.

What next?: Accept after discretionary revisions

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.
