Reviewer's report

Title: A randomised cross-over trial in healthy adults indicating improved absorption of omega-3 fatty acids by pre-emulsification.

Version: 2 Date: 3 November 2006
Reviewer: Philip C Calder

Reviewer's report:

General
This is the revised version of this manuscript. I am generally satisfied with the authors responses and believe that the manuscript is both clearer and improved by these.

-------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

-------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

-------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept without revision

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
