Reviewer's report

Title: Prevalence, Sources, and Predictors of Soy Consumption in Breast Cancer

Version: 1 Date: 5 October 2008

Reviewer: Shantanu Deshpande

Reviewer's report:

I have a couple of minor revisions to suggest.

1. Table 1B is not really needed. Please talk about the results described in the table in text format under the results section.

2. The non-normal distribution of age at diagnosis, BMI, and weekly milligrams intake of genistein and daidzein could be a result of relatively small sample size. This point needs to be mentioned in the discussion section.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
