Dear Editor,

Thank you for the reviewer and editor’s comments for the manuscript entitled “Evaluation of effectiveness of class-based nutrition intervention on changes in soft drink and milk consumption among young adults”. The comments for minor changes made by the reviewers were reviewed and appropriate revisions were made. Reviewer #1 made comments regarding the statistical methods utilized in data analysis for this research project. The authors of this paper have respectfully reviewed these comments and believe that the analyses used in this investigation were appropriate and the statistic data reflect true effects of this study. One of the authors is a statistician and has provided a detailed explanation for the use of the estimated marginal means for this paper in the detailed responses to the reviewers’ comments which are attached. To help the readability of the manuscript the justification of the use of estimated marginal means has been expanded in the current manuscript.

We would like to express our thanks to the reviewers who identified areas of our manuscript that needed corrections or modification. The review process has produced a much stronger manuscript. If you need anything further, please don’t hesitate to contact me at 330-672-2701 or eha@kent.edu

Sincerely Yours,

Eun-Jeong Ha, Ph.D.

Assistant Professor
Nutrition and Dietetics
