Reviewer's report

Title: Perceived Body Image in Men and Women with Type 2 Diabetes Mellitus: Correlation of Body Mass Index with the Figure Rating Scale

Version: 2 Date: 7 July 2009

Reviewer: Michael Davidson

Reviewer's report:

An interesting study that identifies a potentially important issue in regards to motivating patients with type 2 diabetes mellitus to lose weight. The results are marginal but worthy of publication, because any advice that can assist clinicians in improving adherence to lifestyle recommendations is needed.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
