Reviewer's report

Title: Validation of exposure assessment and assessment of recruitment methods for a prospective cohort study of mobile phone users (COSMOS) in Finland

Version: 2 Date: 13 January 2011

Reviewer: Peter D Inskip

Reviewer's report:

1. The manuscript needs editing for style and clarity.

2. In the first paragraph of the discussion, the transition from the second sentence to last sentence is abrupt. Perhaps it could be smoothed by prefacing the last sentence with "A second key finding was that ..".

3. The first sentence of the Conclusions section tilts in a different direction than the first sentence of the Discussion, but this difference may only be of the "glass half-full versus half-empty" variety.

Quality of written English: Needs some language corrections before being published
