Reviewer's report

Title: Associations between Air Temperature and Cardio-Respiratory Mortality in the Urban Area of Beijing, China: A Time-Series Analysis

Version: 2 Date: 22 April 2011

Reviewer: Daniela D'Ippoliti

Reviewer's report:
Authors had adequately taken into account all the major points of concern. The revised paper has been improved thanks to the major revision in the methods and results sections. Due to the lack of studies on the effect of temperature on cardio-respiratory mortality in the Asian countries, we recognize this work relevant in its field.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
