Reviewer's report

Title: Heated indoor swimming pools, infants, and the pathogenesis of adolescent idiopathic scoliosis A neurogenic hypothesis involving delayed epigenetic effects of neurotoxins during development of the central nervous system.

Version: 2 Date: 8 September 2011

Reviewer: Alain Moreau

Reviewer's report:

This paper is now acceptable for publication. The author took care to address all my concerns. The corrections improve significantly the manuscript.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I don't have any competing interests.
