Reviewer's report

Title: Short-term effects of ambient particulates and gaseous pollutants on the incidence of transient ischaemic attack and minor stroke: a case-crossover study

Version: 2 Date: 4 September 2012

Reviewer: Adolfo Figueiras

Reviewer's report:

The manuscript has improving a lot, but there are two aspect that need more details:
1. How were the models constructed? What criteria were used to select the variables?
2. Please, show the results of the sensibility analysis.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Statistical review: Yes, and I have assessed the statistics in my report.
