Reviewer's report

Title: National average household concentrations of PM2.5 from solid cookfuel use: Results from measurements and modeling in India for the Global Burden of Disease -2010 assessment

Version: 2 Date: 22 July 2013

Reviewer: Amna R Siddiqui

Reviewer's report:

- Major Compulsory Revisions (which the author must respond to before a decision on publication can be reached)
  None

- Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

There is a discrepancy in dates of study duration in abstract and in methods; in abstract it states December 2004- March 2005 whereas in methods it states ...between November 2004 to January 2005. Dates need to be consistent or if methodology differed it needs to be clarified. It is expected that authors will take care of consistency in dates.

- Discretionary Revisions (which are recommendations for improvement but which the author can choose to ignore)
  None
