Reviewer's report

Title: Chronic exposure to emissions from photocopiers in copy shops causes oxidative stress and systematic inflammation among photocopier operators in India

Version: 3 Date: 5 July 2013

Reviewer: Stephan van Eeden

Reviewer's report:

Significant more of the exposed group were current smokers and some of the systemic parameters they found different could be due to current cigarette smoking. Correction for that variable has not been made looking at systemic and oxidative stress makers.

Level of interest: An article of outstanding merit and interest in its field

Quality of written English: Needs some language corrections before being published

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
