Title: Acclimatization across Space and Time in the Effects of Temperature on Mortality

Version: 3 Date: 20 September 2014

Reviewer: Jesse Berman

Reviewer's report:

This reviewer has no major compulsory or discretionary revisions that have not already been addressed. Below are a few minor essential revisions.

Line 24: Did the authors want to say ‘investigated heterogeneity’ instead of ‘invested heterogeneity’?

Line 73: Sentence reads awkwardly as it both starts and ends with “For the study.” I recommend removing one.

Line 160; Line 235-236: You are missing a space between temperature and degrees Celsius (to keep consistency).

Line 238: Extra comma after the ‘and’

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.
