Reviewer's report

Title: Cr(V) exposure to male mice: implication on reproductive organs morphology and sperm parameters

Version: 3 Date: 30 March 2005

Reviewer: Erik Ernst

Reviewer's report:

General

---------------------------------------------------------------------------------------------------------------------
Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

---------------------------------------------------------------------------------------------------------------------
Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

---------------------------------------------------------------------------------------------------------------------
Discretionary Revisions (which the author can choose to ignore)

What next?: Accept after minor essential revisions

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

The study is well described and conducted, and can be accepted with the following minor revisions.

The authors shall state if the histological descriptions and the sperm parameters were evaluated in a blinded fashion or not?

In the version presented to me, the bar indications on the micrographs are missing. These must appear on the accepted manuscript.
