Reviewer's report

Title: Concentrations versus amounts of biomarkers in urine: a comparison of approaches to assess pyrethroid exposure

Version: 2 Date: 14 October 2008

Reviewer: Jun Ueyama

Reviewer's report:

Minor Essential Revisions
In table 4, there are some missing in data. For example, Max and Min creatinine excretion rate in Children-Urban subjects are 0.82 and 0.011. If so, Max/Min value will be about 75, but not 7.7. There is same inconsistent in Children-Rural. In creatinine excretion rate, the value of 95th percentile "0.84" in Adults-Urban is higher than max value "0.10". You should correct the mistakes in table 4 carefully.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
