Reviewer's report

Title: Minute ventilation of cyclists, car and bus passengers

Version: 2 Date: 29 September 2009

Reviewer: Judith A Leech

Reviewer's report:

I have rereviewed the paper by Zuurbier and find it much more readable. Since the authors have now stated that this was indeed a submaximal exercise comparison I find the data more useful and their other changes have been helpful as well.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
