Reviewer's report

Title: Fetal loss and maternal serum levels of 2,2',4,4',5,5'-hexachlorobiphenyl (CB-153) and 1,1-dichloro-2,2-bis(p-chlorophenyl)ethylene (p,p'-DDE) exposure in Greenlandic and European populations

Version: 2 Date: 12 January 2010

Reviewer: Ann Aschengrau

Reviewer's report:

The manuscript is much improved but there are several grammatical, punctuation and typographical errors that should be corrected.

Also, please address the following items.

1. Page 13: Low participation in the Ukraine will only limit generalizability if participants differ from non-participants.

2. The titles of Table 2 and 3 should be changed to encompass a description of the counts given in the table.

3. The row descriptors in Tables 2 and 3 are still confusing. Do they mean: Number of previous pregnancies, number of women who ever had a fetal loss, number of women with a prior pregnancy, and number of women with a fetal loss in the last pregnancy?

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
