Reviewer's report

Title: Coronary Artery-Pulmonary Artery Fistula: Case Report

Version: 1 Date: 4 April 2007

Reviewer: Rosa Sicari

Reviewer's report:

General

Interesting and well presented case report. The manuscript would be improved if authors uploaded moving echo images.

What next?: Accept after minor essential revisions

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published
