Reviewer’s report

Title: Arterial pressure changes monitoring with a new precordial noninvasive sensor

Version: 1 Date: 14 August 2008

Reviewer: Michele Masini

Reviewer’s report:

This is an interesting manuscript that may have important clinical implications. I have only minor comments:

1. Please check stress echocardiographic methodology and describe the state-of-the-art protocols (EAE recommendations 2008);
2. Provide more details on patient population;
3. Proof read carefully the manuscript, there are a few typos

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
