Reviewer's report

Title: Primary lung tumor visualised by transthoracic echocardiography

Version: 1 Date: 5 December 2008

Reviewer: Rosa Sicari

Reviewer's report:

This is an interesting case, reporting the incidental visualization of lung cancer in a patient undergoing transesophageal echocardiography. Due to the nature of the journal it would be most important to have more images, preferably movies (there is no space restriction in uploading images).

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Declaration of competing interests:
