Reviewer’s report

Title: Benefit of warm water immersion on biventricular function in patients with chronic heart failure

Version: 1 Date: 26 May 2009

Reviewer: Rosa Sicari

Reviewer’s report:

In the new version of the manuscript authors do address many of the limitations of the previous report. There are only minor comments that they should address:

1. More data on the control group should be reported
2. A figure with the setting to acquire images would be very appealing for the readership of the journal.

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published
