Reviewer’s report

Title: Right atrium myxoma coexisting with antiphospholipid syndrome: A case report.

Version: 1 Date: 11 September 2009

Reviewer: Rosa Sicari

Reviewer's report:

This is an interesting case report. However, it is not clear to this reviewer the relation between the clinical picture of onset and myxoma diagnosis and the relation between myxoma and antiphospholipid syndrome.

Due to the nature of the journal it would be important to have more image and clips.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published

Declaration of competing interests:
