Reviewer’s report

Title: Feasibility of Real-Time Three-Dimensional stress echocardiography: pharmacological and semi-supine exercise

Version: 1  Date: 19 February 2010

Reviewer: Riccardo Bigi

Reviewer’s report:

This is an interesting intra-patient comparison of 2D and 3D stress-echo for assessing known or suspected CAD. Technical and clinical aspects are fully addressed and adequately discussed. Statistical analysis is appropriate. Perhaps, the manuscript could benefit from refined language revision.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
