Reviewer's report

Title: Echocardiography may be useful to detect pulmonary vasculopathy in early stage of pulmonary artery hypertension associated to systemic sclerosis

Version: 2 Date: 25 March 2010

Reviewer: Rosa Sicari

Reviewer's report:

The revision of the manuscript is quite unsatisfactory since authors did not address any of the issues raised by this reviewer. Moreover, no new statistical analysis has been reported as requested. The English language should be revised by a native English reviewer.

Level of interest: An article of importance in its field

Quality of written English: Not suitable for publication unless extensively edited

Statistical review: Yes, and I have assessed the statistics in my report.

Declaration of competing interests:
