Reviewer's report

Title: Capsaicin-resistant arterial baroreceptors

Version: 1 Date: 12 April 2006

Reviewer number: 1

Reviewer's report:

General

-------------------------------------------------------------------------------
Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

-------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Figure 1. The legend in Panel A of Figure 1 must be improved to identify line type and line quality in the figure should be improved to allow better discrimination of each individual line. Much of figure 1 (panels b and C) is not addressed in the text and should be discussed or eliminated.

Page 4, line 41: Figure 4 should be Figure 5.

Figure 6: The legend in Figure 6 is not clear and in fact missing information. This should be corrected.

There is nothing presented under the Conclusion heading. It is assumed that something should be there.

-------------------------------------------------------------------------------
Discretionary Revisions (which the author can choose to ignore)

What next?: Accept after minor essential revisions

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
