Reviewer's report

Title: Quality of work life among primary healthcare nurses in the Jazan region, Saudi Arabia: A cross-sectional study

Version: 2 Date: 1 August 2012

Reviewer: Pamela N Clarke

Reviewer's report:

The revised manuscript is clearly written and informative. The additions/ revisions by the authors enhance the clarity of the findings. Important issues related to the quality of work-life were raised including the fact that nurses may be performing non-nursing tasks during their workday. The methodology was sound with a solid sample size. The results were clearly presented with sufficient information. This information is important to those interested in nursing workforce.

Level of interest: An article of outstanding merit and interest in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
