Reviewer's report

Title: Thailand special recruitment track of medical students: a series of annual cross-sectional surveys on the new graduates between 2010 and 2012

Version: 2 Date: 29 July 2013

Reviewer: Paulo Ferrinho

Reviewer's report:

After considering the re-submission I am of the opinion that the report has major flaws that preclude its publication. Major among these are the unacceptably low response rates, which limit the external validity of the results. The presentation of the statistical analysis is still confusing and unclear.

Level of interest: An article of limited interest

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.
