Reviewer's report

**Title:** A framework for outcome-level evaluation of in-service training of health care workers

**Version:** 2  **Date:** 28 January 2013

**Reviewer:** Barend Gerretsen

**Reviewer's report:**

The article has undergone a major revision and has improved tremendously. The methodology is now clear and consequently brought forward when presenting the results. The use of quotes is maybe too abundant but does add to the paper. The figures are in non-colour print hard to follow but do-able. All components of the model are clearly explained and the example is very useful. No revisions needed for publication.

**Level of interest:** An article of importance in its field

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.

**Declaration of competing interests:**
