Title: Scaling up family medicine training in Gezira, Sudan; A 2-year in-service master program using modern information and communication technology: an observational study

Version: 2 Date: 9 January 2014

Reviewer: Débora Ingrid Yanco

Reviewer's report:

This article has been reviewed by the authors, and was significantly improved by the reviewers feedback. The second received version may be published. I want to highlight the excellent disposition authors had to the revision and their personalized responses for each reviewer.

This article will undoubtedly enable the sharing of an experience that helps guarantee accessibility to health care for the people of Gezira while providing occupational training in the field of family medicine, towards the goal of a better healthcare in a qualified and timely way.
