Reviewer's report

Title: Rural outreach by specialist doctors in Australia: a national cross-sectional study of supply and distribution

Version: 2  Date: 13 August 2014

Reviewer: James Buchan

Reviewer's report:

I do not believe that the authors have responded satisfactorily to my point about the relatively "old" data being used- I think this should be more explicitly noted in the text as a possible limitation to the relevance of findings to current policy.
