Reviewer's report

Title: Profiling Brazilian dentists' using cluster analysis based on job-related variables and perception about profession

Version: 3 Date: 28 May 2010

Reviewer: Kate Clifford Morgaine

Reviewer's report:

I am more than satisfied that the authors have taken into account the various comments I made on the original submitted paper, and recommend that it be accepted for publication.

One small editorial thing: the first sentence of the fifth/final paragraph in the Introduction is rather clumsy. I would rewrite it thus:

In this complex scenario, information about dental professionals' characteristics, including their practice context and personal views of the profession, is lacking.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
