Reviewer’s report

**Title:** The Collaboration for Leadership in Applied Health Research and Care (CLAHRC) as a Policy Response to the "second translational gap" and its implementation as a programme in North West London

**Version:** 2  **Date:** 17 August 2012

**Reviewer:** Michael Hill

**Reviewer's report:**

I am satisfied that the authors have given attention to my comments and I now regard this as a publishable article.

However, my view that this deals with a very specialised issue of probably limited interest outside those specifically concerned with the implementation of this programme remains unchanged.

**Level of interest:** An article whose findings are important to those with closely related research interests

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.
