Reviewer's report

Title: Primary care research on health transition in Africa: time for action

Version: 1 Date: 22 December 2010

Reviewer: Gojka Roglic

Reviewer's report:

Major Compulsory Revisions

This is a well-written article which addresses an important topic. However, it is not clear to this reviewer how this article differs from the more detailed article authored by the same authors earlier in 2010 (Maher et al. research needs for an improved primary care response to chronic non-communicable diseases in Africa. Tropical Medicine and International health 2010:15:176-181). The authors would need to discuss what the present article adds to what they have already published.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Declaration of competing interests:
