Title: Breast cancer screening: evidence of benefit depends on the method used

Version: 6 Date: 12 July 2012

Reviewer: Elsebeth Lynge

Reviewer’s report:

We found your revisions to be incomplete. Please, follow closely the recommendations from the reviewers and change both the text and the tables according to the comments. Please, make sure that you have considered all available literature in your response. Please, write a comprehensive rebuttal letter listing each reviewer comment and the full description of how you have responded to the comment.
