Reviewer's report

Title: The effects of multi-domain versus single-domain cognitive training in non-demented older people: a randomized controlled trial

Version: 2 Date: 20 January 2012

Reviewer: Glenn Smith

Reviewer's report:

I believe the authors have adequately addressed concerns raised by me and the other review and have revised the manuscript appropriately.

Quality of written English: Needs some language corrections before being published

Statistical review: No, the manuscript does not need to be seen by a statistician.
