Reviewer’s report

Title: Incidence and prognosis of non-specific chest pain among patients recruited from consecutive series of hospitalizations for acute coronary syndrome

Version: 1 Date: 2 March 2012

Reviewer: Guy Eslick

Reviewer’s report:

This is an interesting manuscript, but it requires some changes.

Could the authors please expand their literature search by including PubMed as one of the search engines.

Also, could the authors please expand their terminology and include non-cardiac/noncardiac chest pain and atypical chest pain as I feel this will provide more articles for inclusion into the review.

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
