Reviewer's report

Title: Collectives of diagnostic biomarkers identify high risk subpopulations of haematuria patients: exploiting heterogeneity in large-scale biomarker data

Version: 4 Date: 18 October 2012

Reviewer: Andrew Vickers

Reviewer's report:

Please review the paper with respect to statistical terminology. For example, AUC does not have a standard deviation.

Please avoid terminology like "remarkably different". Let the data speak for itself and don't oversell the results.

Quality of written English: Needs some language corrections before being published

Statistical review: Yes, and I have assessed the statistics in my report.
