Reviewer’s report

Title: Recent advances in the diagnosis and treatment of bladder cancer

Version: 4 Date: 17 September 2012

Reviewer: Peter Black

Reviewer’s report:

The authors have done a good job of addressing the various points and the manuscript is much improved.

One comment has remained unchanged which I think is unacceptable, and discordant with what the authors have otherwise written:
"Strategies for bladder preservation have been investigated in selected patients who decline surgery or are not fit for surgery".

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
