Reviewer's report

Title: Hospital admissions for vitamin D related conditions and subsequent immune mediated disease: record-linkage studies

Version: 1 Date: 28 May 2013

Reviewer: Bruce Hollis

Reviewer's report:

The authors have presented a very novel manuscript. It raises many intriguing possibilities about the association between vitamin D deficiency and immune-mediated disease. This author has no substantial criticisms of the work and believes it is an asset to this area of investigation.
