Reviewer's report

Title: A method for inferring medical diagnoses from patient similarities

Version: 3 Date: 2 June 2013

Reviewer: Ferran Sanz

Reviewer's report:

The present paper describes an interesting piece on computer-assisted medical diagnosis of work that deserves to be published in BMC Medicine.

Nevertheless, it has some aspects that this reviewer consider that should be improved:

1) This reviewer guess that other related works on the matter (patient diagnosis on the basis of patient similarities) have been done and published. Nevertheless, no one is clearly identified and discussed in

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.
