Reviewer's report

Title: Novel Approaches to Minimize Ventilator-Induced Lung Injury

Version: 1 Date: 11 December 2012

Reviewer: Peter Papadakos

Reviewer's report:

I found this a excellent well written review. It covers a number of new therapies such as NAVA, Targeted pressure management, ECMO, Anticytokine therapy and others in a concise manner. The discussion of future leads the reader to think on how he can improve his patients with ARDS. I believe this review may stimulate further investigations.

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
