Reviewer’s report

Title: The intergenerational effects of war on the health of children

Version: 1 Date: 18 December 2013

Reviewer: imti choonara

Reviewer’s report:

an interesting paper on the intergenerational effects of war on child health. The authors have extensively reviewed the literature and accurately described the effects. The paper could be improved by the use of tables to summarise some of the existing literature. this would allow them to shorten the text.

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I am a member of the charity Medact. I note the 2nd author is from Medact. I have not seen the manuscript before and was unaware of its existence before being asked to review it.
